

Livie & Luca's shoes run from American size 3.5 to size 12. Our shoes generally fit pre-walkers to preschool aged children.

To ensure the best fit please print out the following footprints on a letter sized paper (8.5 by 11) and have your child stand on the guide. The ideal fit would leave an extra quarter to half an inch of space to make room for a growing foot.

For example, if Luca stands on the guide and his foot lands in the size 4 footprint, there should be 1/4 to 1/2 inch of space between the edge of his big toe and the traced outline of the size 4 shoe.

Most of our styles fit normal to wide feet. The easy to adjust velcro closure allows different widths to have a perfect fit. However, we do have a few styles that are more appropriate for narrower feet. Please refer to the description of each shoe for these details.
